Includes lease condensate.

Note: Due to independent rounding, individual product detail may not add to total.

Source: EIA, Petroleum Supply Monthly, May 2003.

Net Imports = Gross Imports (line 3) + Strategic Petroleum Reserve (SPR) Imports (line 4) - Exports (line 5). Unaccounted-for Crude Oil is a balancing item. See Glossary for further explanation.

Includes finished petroleum products, unfinished oils, gasoline blending components, and natural gas plant liquids.

Includes crude oil product supplied, natural gas liquids, liquefied refinery gases (LRGs), other liquids, and all finished petroleum products except motor gasoline, jet fuels, and distillate and residual fuel oils.

6 Includes domestic and Customs-cleared foreign crude oil in transit to refineries

Includes domestic and Customs-cleared foreign crude oil in transit to refineries.
 Included are stocks of all other oils such as aviation gasoline, kerosene, natural gas liquids and LRGs, other hydrocarbons and oxygenates, aviation gasoline blending components, naphtha and other oils for petrochemical feedstock use, special naphthas, lube oils, waxes, coke, asphalt, road oil, and miscellaneous oils.

Crude oil stocks in the SPR include non-U.S. stocks held under foreign or commercial storage agreements.

Distillate fuel oil stocks located in the "Northeast Heating Oil Reserve" are not included. For details see Appendix D.
